

Conclusion of crushing for 2025/26 crop

São Paulo, December 10, 2025 – São Martinho S.A. (B3: SMTO3) announces to its shareholders and the general market the conclusion of the sugarcane crushing period for the 2025/26 crop ("12M26").

The following table presents a comparison between the production data reported in the guidance provided to the market through the Material Fact dated November 10, 2025, and the result of the crop year.

	Actual 12M26	Guidance 12M26*	Var. (%)
Operational Data			
Crushed Cane ('000 metric tons)	21,672.6	22,000.0	-1.5%
Average TRS (kg/metric ton)	139.4	137.6	1.3%
TRS Produced	3,020.7	3,027.5	-0.2%
Production Data			
Sugar ('000 metric tons)	1,423.1	1,420.1	0.2%
Ethanol ('000 m³)	908.7	914.6	-0.6%
Cogeneration - Exports('000 MWh)	840.2	896.4	-6.3%
Yeast ('000 metric tons)	18.3	20.6	-11.2%
Sugar - Ethanol Mix	49% - 51%	49% - 51%	

(*) Guidance updated in Material Fact Notice on November 10, 2025.

The sugarcane operation concluded the milling period for the 2025/26 crop year in line with the updated guidance. The volume of sugarcane crushed totaled approximately 21.67 million tons with an average TRS level of 139.4 kg/ton. The total TRS produced was 3,020.7 million. The production mix reflects market conditions – with 51% of the total recoverable sugars (TRS) allocated to ethanol production.

This announcement concerns exclusively the sugarcane agricultural operation. The corn ethanol plant and the cogeneration plant remain in operation in accordance with the guidance.
